DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/959,698, filed on November 5, 2001.

Response to Preliminary Amendment

2. The preliminary amendment of January 13, 2004 canceled claims 1-12 and added new claims 13 and 14. Accordingly, the claims now pending are claims 13 and 14.

Obviousness-type Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1624

4. Claims 13 and 14 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3 and 1, respectively of allowed parent Application No. 09/959,698. Although the conflicting claims are not identical, they are not patentably distinct from each other because method of preparing anhydrous quaternary ammonium salt of formula (I) of claim 3 of the parent application anticipates the process of the present claim 13 and the method of preserving the quaternary ammonium salt of formula (I) of claim 1 of the parent application anticipates the method of present claim. Where no anticipated, the present claims involve simple optimization of reaction conditions by routine experimentation.
5. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
